Suggestions:

- Define a specific, painful problem you are solving.
- Identify your precise target user segment; 'Small Business Owner, General Consumer' is too broad.
- Articulate your unique value proposition (UVP) – what makes your app different and better?
- Research your competitors; even if you think you have none, there are always existing solutions (direct or indirect) that user
- Refine your feature set to directly address the defined problem and deliver your UVP.
- Re-evaluate your financial projections, particularly OPEX, which appears significantly underestimated for an app of this scop
- Consider an MVP (Minimum Viable Product) approach to validate your core hypothesis once the problem and UVP are clea
